**Diocese of Youngstown (DOY) Credit Union Selects GBS --  
To Provide Them With The Sharetec Core Processing Solution**

Youngstown, Ohio – February 8, 2012

Selecting a software solution can be a huge decision and a daunting task. With this in mind, GBS has been installing and supporting credit union solutions since 1980. Our expertise and cost effective software, Sharetec, keeps credit unions of all sizes ahead of competitors with technology that members expect, updates that regulations require, and support that ensures smooth operation.

After a thorough review of core data processing systems, the Diocese of Youngstown (DOY) Credit Union selected the state-of-the-art Sharetec Credit Union Management solution through GBS. Sharetec is a world-class product that has added exciting and valuable features over the past year. These innovations will provide the credit union with the ability to automate manual tasks, improve efficiencies, and streamline operations and, thus, compete and serve at a much higher level. In conjunction with this initiative, DOY will be eventually implementing the Home Banking and Mobile Banking modules, which will allow members to complete transactions from their own home computer or mobile device when it is most convenient for them.

Ultimately, the GBS/Sharetec solution will allow DOY to better service their members in the future. According to Dan Miller, Vice President, Credit Union, GBS, "We are excited to provide DOY with excellent support and a software solution that will not only enhance their member services, but also provide them with better security and peace-of-mind."

James Bellavia, CFO, DOY explained, "We feel the partnership with GBS is going to greatly enhance DOY's ability to improve our services to our members especially within our mortgage and tuition loan programs. Also, with the ability to eventually provide home banking, we envision a greater expansion into six counties covered in DOY's field of membership."

The partnership between DOY and GBS is a winning situation.

**About Diocese of Youngstown Federal Credit Union (DOY):** DOY has a closed membership that includes the employees and students of all the agencies in the Diocese of Youngstown. DOY recently expanded its field of membership to include the parishioners of all the parishes in the Diocese. DOY has been serving its members throughout the Diocese of Youngstown for the past forty years with exceptional financial products. They have over 4,000 members with assets of more than \$40 million.

**About GBS:** GBS Corp is headquartered in North Canton, Ohio, while the Credit Union Division is located in Youngstown, Ohio. GBS is an information solutions provider that drives productivity for many of America's best companies. At GBS, we understand that credit unions serve members, not customers – and we're committed to helping them improve their members' experience. That's why we've developed an easy-to-use software solution that efficiently integrates all aspects of credit union operations, and stays current with changes in regulations of new consumer technologies.

In addition to providing the Sharetec solution, GBS also offers the following products and services:

- NextGen®, the industry's leading Electronic Health Records (EHR) and Practice Management software.
- FileBound, an affordable, web-based Content Management Solution utilized to control, manage, and distribute documents and information.
- Conversion and Scanning Services, a service to convert clients' documents to digital format efficiently and securely.
